

AD 2 AERODROMES

RJGG AD 2.1 AERODROME LOCATION INDICATOR AND NAME

RJGG - CHUBU CENTRAIR International

RJGG AD 2.2 AERODROME GEOGRAPHICAL AND ADMINISTRATIVE DATA

1	ARP coordinates and site at AD	345130N/1364819E 168° / 1.75km FM RWY 18 THR
2	Direction and distance from (city)	35km S fm Nagoya City
3	Elevation/ Reference temperature	12ft / 31°C(2009-2013)
4	Geoid undulation at AD ELEV PSN	125ft
5	MAG VAR/ Annual change	6°58'W(2005) / Annual Change 0.7'W
6	AD Administration, address, telephone, telefax, telex, AFS, e-mail and/or Web-site addresses	CENTRAL JAPAN INTERNATIONAL AIRPORT CO.,LTD.(CJIAC) 1-1, Centrair, Tokoname, Aichi, 479-8701 JAPAN Tel :0569-38-1500 Fax: 0569-38-1510 AFS: RJGGYDYX, Web: https://www.centrair.jp
7	Types of traffic permitted (IFR/VFR)	IFR/VFR
8	Remarks	Chubu International Airport Office(CAB) 1-1, Centrair, Tokoname, Aichi, 479-0881 JAPAN Tel: 0569-38-2155, Tel: 0569-38-2158(AIS) AFS: RJGGYFYX

RJGG AD 2.3 OPERATIONAL HOURS

1	AD Administration	H24
2	Customs and immigration	H24
3	Health and sanitation	H24
4	AIS Briefing Office	H24
5	ATS Reporting Office(ARO)	Nil
6	MET Briefing Office	H24
7	ATS	H24
8	Fuelling	H24
9	Handling	H24
10	Security	H24
11	De-icing	Nil
12	Remarks	Nil

RJGG AD 2.4 HANDLING SERVICES AND FACILITIES

1	Cargo-handling facilities	All the modern institutions that deal with the weight thing to a Boeing747 type freighter.
2	Fuel/ oil types	Fuel grades: JET A-1 Oil grades: All turbine grades
3	Fuelling facilities/ capacity	Hydrant refueling, Fuel truck/ Ask AD Administration
4	De-icing facilities	Nil
5	Hangar space for visiting aircraft	Ask AD administration Tel: 0569-38-7850 E-mail: businessjet@cjiac.co.jp
6	Repair facilities for visiting aircraft	Nil
7	Remarks	Nil

RJGG AD 2.5 PASSENGER FACILITIES

1	Hotels	At Airport
2	Restaurants	At Airport
3	Transportation	Railways, Buses, Taxis and Ships
4	Medical facilities	First aid treatment, ambulance; hospital in Tokoname city 6km
5	Bank and Post Office	At Airport
6	Tourist Office	At Airport
7	Remarks	Nil

RJGG AD 2.6 RESCUE AND FIRE FIGHTING SERVICES

1	AD category for fire fighting	CAT 9
2	Rescue equipment	Chemical fire fighting truck × 4 Water-supply truck Lighting power supply truck Emergency medical equipments conveyance truck Destructive wrecking truck
3	Capability for removal of disabled aircraft	Nil
4	Remarks	Nil

RJGG AD 2.7 SEASONAL AVAILABILITY-CLEARING

1	Types of clearing equipment	Snow remove equipments: 3 snow ploughs and 2 snow sweepers
2	Clearance priorities	Nil
3	Remarks	Seasonal availability: All seasons Snow removal will be commenced,if the RWY and TWY are covered with a depth of 3cm snow or more.

RJGG AD 2.8 APRONS, TAXIWAYS AND CHECK LOCATIONS DATA

1	Apron surface and strength	<p>Apron:</p> <p>From spot 1 to spot 9, from spot 101 to spot 119, from spot 201 to spot 206 Surface: cement-concrete, Strength: PCN 87/R/B/X/T</p> <p>From spot 10 to spot 25, from spot 71 to spot 75, from spot 301 to spot 306, from spot 401 to spot 408, from spot 501 to spot 508, spot 601E, 601W Surface: cement-concrete, Strength: PCN 101/R/B/X/T</p> <p>From spot 76 to spot 80 Surface: cement-concrete, Strength: PCN 74/R/B/X/T</p> <p>ACFT stand taxilane D, D6, D7 Surface: cement-concrete, Strength: PCN 87/R/B/X/T</p> <p>ACFT stand taxilane D5, E, E2-E6 Surface: cement-concrete, Strength: PCN 101/R/B/X/T</p> <p>ACFT stand taxilane J, K3 Surface: cement-concrete, Strength: PCN 74/R/B/X/T</p> <p>ACFT stand taxilane P Surface: asphalt-concrete, Strength: PCN 90/F/A/X/T</p> <p>Small Aircraft Apron:</p> <p>From spot N1 to spot N3, spot N5, N6 Surface: cement-concrete, Strength: PCN 24/R/B/X/T</p> <p>Spot N4 Surface: asphalt-concrete, Strength: PCN 53/F/A/X/T</p> <p>ACFT stand taxilane N Surface: asphalt-concrete, Strength: PCN 67/F/A/X/T</p>

RJGG AD 2.9 SURFACE MOVEMENT GUIDANCE AND CONTROL SYSTEM AND MARKINGS

1	Use of aircraft stand ID signs, TWY guide lines and Visual docking/ parking guidance system of aircraft stands	ACFT stand ID signs: Spot 1 - 12, 14 - 25, 71 - 80, 72A, 74A ACFT stand taxi lane: D, D5, D6, D7, E, E2, E3, E4, E5, E6, J, K3, N and P (See RJGG AD2.24 CHART) Visual docking guidance system: Spot 1 - 12, 14 - 24 (See attachment)
2	RWY and TWY markings and LGT	RWY: RWY18/36 (Marking) RWY designation, RWY CL, RWY THR, RWY middle point, Aiming point, TDZ, RWY side stripe (LGT) RCLL, REDL, RTHL, RENL, RTZL, WBAR TWY: All TWY (Marking) TWY CL, TWY side stripe (LGT) TWY edge LGT, TWY CL LGT, Taxiing guidance sign TWY: TWY A1 - A10 (Marking) RWY HLDG PSN, Mandatory instruction marking (A1-A3S, A8N-A10) (LGT) Stop bar LGT, RWY guard LGT TWY: TWY A6, B-TWY BTN B4 and B6N, C-TWY BTN C9 and C10, behind SPOT 119 (Marking) SFC painted LCA sign and SFC painted direction sign
3	Stop bars	Stop bar LGT : TWY A1 - A10 Stop bar LGT operations are as follows; 1) Stop bar LGT installed at each taxi-holding position with RWY 18/36. 2) Stop bar LGT will be operated when the visibility or the lowest RVR of RWY 18/36 is at or less than 600m. 3) Stop bar LGT on TWY A1,A2 and A9,A10 are controlled individually by ATC. 4) Stop bar LGT on TWY A3S through A8N are not controlled individually by ATC. 5) During the period stop bar LGT are operated, TWY A3S through A8N are not available for the departing aircraft.
4	Remarks	(Marking) Overrun area, ACFT PRKG PSN, APN TWY CL (LGT) Apron flood LGT

Visual Docking Guidance System (VDGS)

I.SAFEDOCK

1.General

- (1) Aircraft parking stands NR1 - 12, 14 - 24 are equipped with a SAFEDOCK visual docking guidance system.
The pilots of an arriving aircraft assigned to park at one of these parking stands can use this system to be guided and stop the aircraft at the correct parking position.
- (2) This system is operational only in the automatic mode and in an event of a system failure, the aircraft shall be manually guided by a marshaller to the stopping position.
- (3) The SAFEDOCK visual docking system consists of a display screen for pilots and a laser scanner.
The system detects and analyses the aircraft type of an approaching aircraft, tracks it through the laser scanner, and displays these results on the display screen.
- (4) The display screen indicates the following information:
 - a) type of the approaching aircraft
 - b) deviation from the lead-in center line
 - c) distance to the stopping position.
 The above information is provided equally to the pilots on both left seat and right seat.

2.Aircraft Type Indication

- (1) A message about the aircraft type from SAFIS (Stand Allocation & Flight Information System) shall be confirmed and put into the system by ground operator.
The system then carries out internal calibration and starts laser scanning simultaneously.
The system shows the aircraft type on the display screen and then will begin to indicate yellow lead-in arrows scrolling upwards prompting the aircraft to proceed. (Fig.1)

Fig.1

- (2) When the laser scanner detects the approaching aircraft, the display screen will indicate the aircraft type, a "T" bar, and a lead-in upward arrow in yellow. (Fig.2)

Fig.2

- (3) At least until the approaching aircraft arrives at a point 12 meters before the stopping position, the system will identify the aircraft type and will compare with the previously input aircraft type, if these data match, the system will continue its operation. If they do not match, the display screen will repeatedly indicate "STOP", "ID" and "FAIL" in sequence and will indicate 2 illuminated red squares simultaneously. (Fig.3, Fig4, Fig5)

NOTE: At this moment, the pilots must stop the aircraft immediately. When the operator re-input the correct aircraft type into the system and the system finds it correct, it resumes normal operations indicating the correct aircraft type on its display screen.

→ Fig.3 → Fig.4 → Fig.5

Fig.3

Fig.4

Fig.5

3. Taxiing and Lateral Center line Guidance

- (1) While taxiing the aircraft using the system, the pilots should maneuver the aircraft at a low speed to the stopping position. In an event when "SLOW" is indicated on the display screen, the pilots should further reduce the taxiing speed until "SLOW" disappears. This "SLOW" is indicated between 24 and 6 meter point from the stopping position. The speed which "SLOW" is indicated is 5kt or more within the 24 meter point, 2.5kt or more within the 6 meter point from the stopping position. (Fig.6)

Fig.6

- (2) Deviation of an upward yellow arrow from the center line of "T" indicates the deviation of the approaching aircraft relative to the center line of the parking stand either to right or left. Further, an additional flashing red arrow on either side indicates the required direction for the aircraft to turn. This flashing red arrow is not indicated between 2 and 0 meter point from the stopping position, even if the aircraft shifts from the center line. (Fig.7, Fig.8)

Fig.7

Fig.8

4. Stop Guidance

- (1) When the approaching aircraft is within 30 meters from the stopping position, display of digital countdown will start. As the aircraft approaches the stopping position, digital countdown is shown by 1 meter unit between 30 and 2 meters, or by 0.2 meters unit between 2 and 0 meters.
- (2) When the approaching aircraft is within 16 meters from the stopping position, the shaft of the illuminated "T" will start to reduce in its length from the bottom to indicate the approaching rate of the aircraft, indicating the remaining distance to the stopping position successively. (Fig.9, Fig.10)
As the aircraft approaches the stopping position, the shaft of the illuminated "T" retract one row for every 0.5 meters.
- (3) When the aircraft reaches the stopping position, a message "STOP" will be displayed on the screen together with two red squares, one each at the either side of the screen at the positions previously used for indication of a direction to turn. (Fig.11)

Fig.9

Fig.10

Fig.11

- (4) When the aircraft is stopped at the correct stopping position, a message "OK" will be displayed on the screen in several seconds. (Fig.12)

Fig.12

- (5) When the operator applies chocks, and switches on "CHOCK ON" switch, the display screen will display "CHOCK ON". (Fig.13)

Fig.13

- (6) If the aircraft stops at a position beyond the correct stopping position, a message "TOO FAR" will be displayed on the screen. (Fig.14)

Fig.14

5. Cautions and Safety

- (1) When the system displays an incorrect aircraft type, or when such a message as "STOP", "ID", "FAIL", or "WAIT" appears on the display screen, the pilots should stop the aircraft immediately. (Fig.3, Fig.4, Fig.5, Fig.11, Fig.15)

Fig.15

- (2) Bad weather condition, during heavy fog, rain or snow, the visibility for the docking system can be reduced. When the system is activated and in capture mode, the display screen will deactivate the floating arrows and indicate "Aircraft type" and "SLOW". (Fig.16)

This message will be superseded by the "T" bar, as soon as the system detects the approaching aircraft.

The pilot must not proceed beyond the bridge, unless the "SLOW" text has been superseded by the "T" bar.

Fig.16

- (3) System breakdown, in case of a severe system failure, the display screen will go black, except for 2 red squares indicator. A manual backup procedure must be used for docking guidance. (Fig.17)

Fig.17

6. Remarks

- (1) In CHUBU CENTRAIR, stopping positions are different depending on the aircraft size, aircraft type or each stand. Stopping positions of small aircraft are further than large aircraft from the end of center line. The length is Maximum 25 meters away from the end of center line. (Minimum 5 meters)

And the length is Maximum 68 meters away from the VDGS. (Minimum 39 meters). (Fig.18)

So, small aircraft must reduce the speed sufficiently beforehand. Pilot should keep this in mind, before going into the stand.

As a reference, painted markings of the model name are provided at the stopping positions of some small aircraft.

*Small aircraft : B737, B757, A320, A310, MD81/87/90 etc.

Fig. 18

Type of Surface Painted Markings

1. Type of Surface Painted Markings
 - Surface Painted Direction Sign
This type of marking at a taxiway intersection indicates the designation and direction of taxiway leading out of intersection. Black inscriptions with a yellow background.
 - Surface Painted Location Sign
This type of marking indicates the designation of the taxiway on which the aircraft is located. Yellow inscriptions with a black background and yellow frame.
2. On each of the Taxiway A6, B, B5, B6, C, D5, D6, E5 and E6, surface painted markings are provided(refer attached drawing).

RJGG AD 2.20 LOCAL TRAFFIC REGULATIONS

1. Airport regulations

1.1 定期便または緊急事態以外の航空機の取扱い

当空港の使用について、航空機の運航者は、空港管理者の許可を得ること。

1.2 管制方式

1.2.1 出発機は次に掲げる方式に従うこと。

- 1) 管制承認
出発機はエンジン始動 5 分前の通報に合わせて、次に掲げる項目を“セントレアデリバリー”に通報すること
 - a) 航空機呼出符号
 - b) 目的地
 - c) 要求高度（もしあれば、代替要求高度）
 - d) 駐機位置（スポット番号）
 - e) 代替飛行経路（もしあれば）
- 2) “セントレアデリバリー”から管制承認を受領した後は、“セントレアグラウンド”の周波数を聴取し、プッシュバックまたは、TAXIの準備が完了した場合は、“セントレアグラウンド”へ通報すること。
- 3) パイロットはプッシュバック及び／またはエンジン始動時期が遅れることが予想される場合は、“セントレアグラウンド／デリバリー”に対しその旨通報すること。
ただし、他の航空機の地上交通による遅延または出発制御時刻等が付加されたために生じる遅延を除く。
- 4) インターセクション・ディパーチャー
 - a) AD1.1.6.3.2.2(2) 項に記載されている出発機間の管制間隔は、誘導路 A2 または A9 から出発する航空機には適用されない。
AD1.1.6.3.2.2(2) における管制間隔を必要とする航空機は、その旨を“セントレアグラウンド／タワー”に適宜通報すること。
 - b) 出発機は、パイロットの同意がなくても誘導路 A2/A9 からのインターセクションディパーチャーを指示されることがある。誘導路 A2/A9 から出発することができない航空機は、その旨適宜“セントレアグラウンド／タワー”に対し通報すること。

1.2.2 バードストライクを防止するため、風速が概ね 7 ノット以下の場合、鳥の活動場所を考慮して滑走路が選定されることがある。

1.1 Aircraft operations other than scheduled flights or in an emergency.

On use of this airport, aircraft operator is required to obtain the permission of airport administration.

1.2 ATC Procedures

1.2.1 Departing aircraft shall comply with the following procedures.

- 1) ATC clearance
Advise “CENTRAIR DELIVERY” 5 minutes prior to starting engines with the following items
 - a) call sign
 - b) destination
 - c) proposed flight level/ altitude
(alternative flight level/altitude, if any)
 - d) parking position (spot number)
 - e) alternative flight routes, if any
- 2) After receiving clearance from “CENTRAIR DELIVERY”, monitor “CENTRAIR GROUND”. Call “CENTRAIR GROUND” when ready for push back/for Taxiing.
- 3) Pilots shall advise “CENTRAIR GROUND/ DELIVERY” if any delay in push-back and/or engine start-up is anticipated except when delay has been caused by other ground traffic or departure time restriction such as release time.
- 4) Intersection departure
 - a) Separation for departure as in AD1.1.6.3.2.2(2) will not be applied to aircraft departing from TWY A2 or A9. Aircraft requiring separation in AD1.1.6.3.2.2(2) shall advise “CENTRAIR GROUND / TOWER” accordingly.
 - b) Departing aircraft may be instructed intersection departure from TWY A2/A9 without pilot's consent. Aircraft unable to depart from TWY A2/A9 shall advise “CENTRAIR GROUND/TOWER” accordingly.

1.2.2 To prevent bird-strikes, runway may be selected considering the location of bird activity when wind is about 7 knots or less.

1.3 補助動力装置の使用制限

航空機が固定動力設備付きのスポットを使用する場合は、空港管理者が特に必要と認める場合を除き、次に掲げる時間を越えて補助動力装置を使用してはならない。

- (1) 出発予定時刻前の 30 分間
- (2) 到着後、固定動力設備が使用可能となるまでに必要とする最小限度の時間。
- (3) 航空機が点検整備のため補助動力装置を必要とする場合は、それに要する最小限度の時間

備考：

スポット 2-12, 14-25, 71-80, 72A, 74A, 107, 109, 110, 111, 113, 115, 116, 118 及び 119 は、固定動力設備が設置されている。
スポット 2-12 及び 14-24 は、固定電源及び空調設備が設置されている。
スポット 25, 71-80, 72A, 74A, 107, 109, 110, 111, 113, 115, 116, 118 及び 119 は、固定電源設備が設置されている。

1.3 Restrictions about the use of auxiliary power units(APU)

When an aircraft is using an aircraft parking stand with fixed power facilities, APU shall not be used outside the time periods specified below except when specifically acknowledge by airport administration as necessary.

- 1) Less than 30 minutes prior to the estimated off-block time.
- 2) The minimum time required for switching over to the fixed power facilities, after arrival at the parking stand.
- 3) For the minimum time required for aircraft maintenance purposes if needed.

NOTE:

Spot 2 - 12, 14 - 25, 71 - 80, 72A, 74A, 107, 109, 110, 111, 113, 115, 116, 118 and 119 are aircraft parking stands with fixed power facilities.
Spot 2 - 12 and 14 - 24 are equipped with electric power unit and pre-conditioned air unit.
Spot 25, 71-80, 72A, 74A, 107, 109, 110, 111, 113, 115, 116, 118 and 119 are equipped with electric power unit.

1.5 A380-800 及び AN-124 に係る運用について

(1) 誘導路及びエプロン

A380-800 の地上移動については AD2.20 6.2<Fig1> に示される範囲内、AN-124 の地上移動については AD2.20 6.2<Fig2> に示される範囲内に限ること。

- (a) A380-800 による E (スポット 20 から 21)、E2、E5 スポット誘導経路及び B5 誘導路の使用は、空港管理者の事前承認があった場合に限ること。
- (b) A380-800がE5スポット誘導経路を使用しているときは、E6スポット誘導経路の使用機材は翼幅 65m 以下の航空機に限ること。
- (c) A380-800 がスポット 15 に駐機する際は、E5 スポット誘導経路を経由し、破線で示された航空機導入線を活用すること。
- (d) AN-124 による E2、E3 又は E4 スポット誘導経路の使用は、空港管理者の事前承認があった場合に限ること。

(2) 駐機場

A380-800 が駐機可能なスポットは NR15, NR20, NR117, NR118, NR119 及び NR601E である。ただし、NR15, NR20 及び NR601E の使用については、空港管理者の事前承認があった場合に限ること。

1.5 Operation for A380-800 and AN-124

1) Taxiway and Apron

Ground movement of A380-800 and AN-124 is only permitted within the area shown on the attached chart "AD2.20 6.2 <Fig1>" and "AD2.20 6.2 <Fig2>", respectively.

- a) A380-800 can only use E (BTN SPOT NR20 and NR21), E2 and E5 aircraft stand taxilane, and B5-TWY with prior approval from airport administration.
- b) When A380-800 is on E5 aircraft stand taxilane, WS of the aircraft on E6 aircraft stand taxilane should be 65m or less.
- c) When entering SPOT NR15, A380-800 should taxi via E5 aircraft stand taxilane, and use the broken lead-in line.
- d) AN-124 can only use E2, E3 and E4 aircraft stand taxilane with prior approval from airport administration.

2) Parking stands

Parking stands for A380-800 are: NR15, NR20, NR117, NR118, NR119 and NR601E.
However prior approval from airport administration is required when using spots NR15, NR20 and NR601E.

1.4 PDA(parts departing aircraft) reporting to Airport Administration

In order to secure the safety of aircraft operations and to rectify the issue of falling objects from aircraft operating in the vicinity of Chubu Centrair International Airport, aircraft operators are required to notify Airport Administration (Tel 0569-38-1500, Fax 0569-38-1510, E-mail centrair-notice@cjiac.co.jp) of any "Parts Departing Aircraft" from flights operating to/from Chubu Centrair International Airport, without delay. This information shall be shared by relevant parties in order to prevent recurrence of such.

2. Taxiing to and from stands

2.1 エプロンにおけるジェットブラストによる影響の回避

- (1) エプロンを地上走行する場合、可能な限りエンジン出力を絞ること。
- (2) RJGG AD2.9 に示されているストップラインで待機する場合、操縦席がラインの真上に来るように航空機を停止させること。

2.1 Avoidance jet blast damage on the apron.

- 1) When taxiing on the apron, reduce engine power to the extent practicable.
- 2) When holding at the stop line shown on RJGG AD2.9, stop the aircraft so that the cockpit comes directly over the line.

3. Parking area for small aircraft(General aviation)

Nil

4. Parking area for helicopters

Nil

5. Apron - taxiing during winter conditions

Nil

6. Taxiing - limitations

6.1 誘導路交差点の翼端クリアランス

(AD1.1.6.8 参照)

誘導路上の停止位置に待機中の航空機と後方の誘導路を走行する航空機の翼端クリアランスは以下のとおりである。

When B744 holding at the stop marking on TWY A2, A3S, A8N or A9.

Wing Span (WS) of aircraft taxiing on A TWY	WS ≤ 28m	WS > 28m
Wing tip clearance	*B	*C

6.1 Wing tip clearance at the TWY intersection

(REF. AD1.1.6.8)

Wing tip clearance at the TWY intersection between the aircraft holding at the stop marking on the TWY and the other aircraft taxiing behind it are as follows.

Legend:

*A : wing tip clearance ≥ 15m

*B : 6.5m ≤ wing tip clearance < 15m

*C : wing tip clearance < 6.5m

6.2 走行可能な誘導路及び安全対策

航空機の翼幅毎の走行可能な誘導路及び安全対策は以下のとおり。

6.2 Available TWY and safety measures

TWY and safety measures for each aircraft wing span(WS) are as follows.

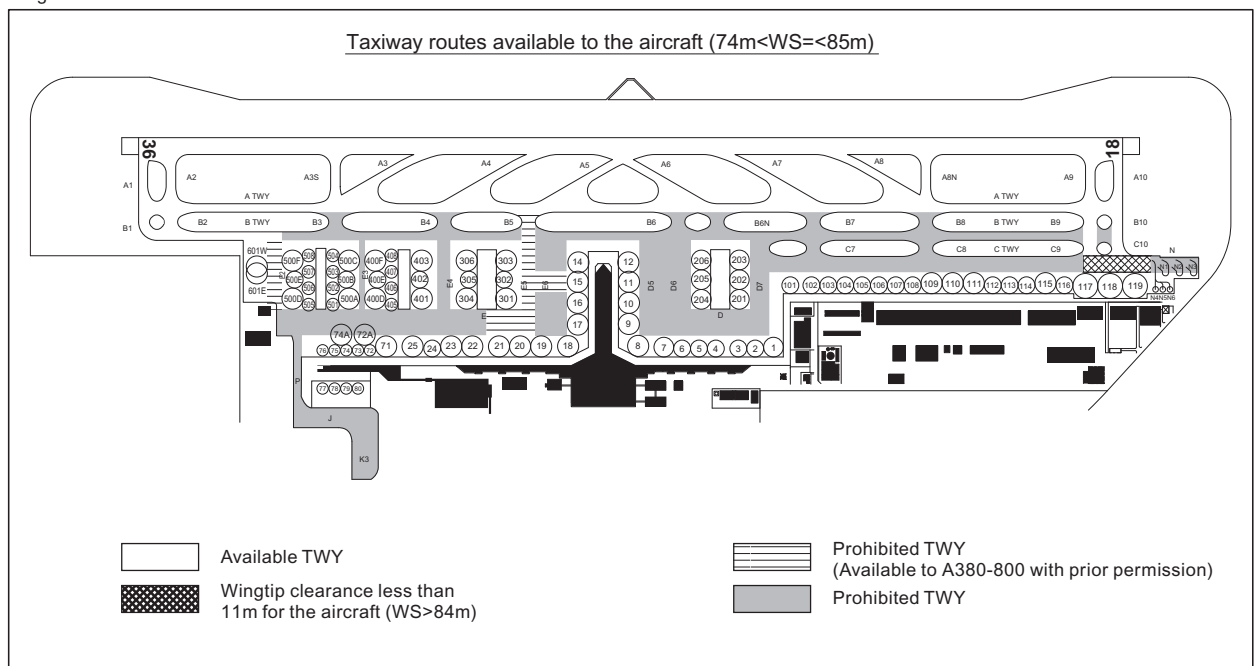

Wing Span (WS)	Available TWY	TWY with Restrictions (*1)	Remarks
74m <WS≤ 85m (*2)	A, A1 THRU A10 B(from B1 to E2), B1, B2, B9, B10 C(from spot NR117 to NR119), C9, C10	WS > 84m C(from spot NR117 to NR119)	See attached Fig.1
70m <WS≤ 74m (*3)	A, A1 THRU A10 B, B1 THRU B10 C(from spot NR117 to NR119), C9, C10	WS > 73m B(between E2 and D7)	See attached Fig.2
65m <WS≤ 70m	A, A1 THRU A10 B, B1 THRU B10 C(from spot NR117 to NR119), C9, C10 D, D5 THRU D7 E, E2 THRU E6	-	See attached Fig.3
WS ≤ 65m	All TWY and all ACFT stand taxilanes	WS > 63m C(from spot NR101 to NR116)	See attached Fig.4

*1: In order to keep clearance between other aircraft or obstacle, the aircraft which has wing span(WS) listed in the table shall reduce taxiing speed and shall strictly follow the taxiway center line on the following TWY.

*2: Taxiing operation of A380-800 is described on AD2.20.1.5 (1) (a), (b) and (c).

*3: Taxiing operation of AN-124 is described on AD2.20.1.5 (1) (d).

<Fig.1>

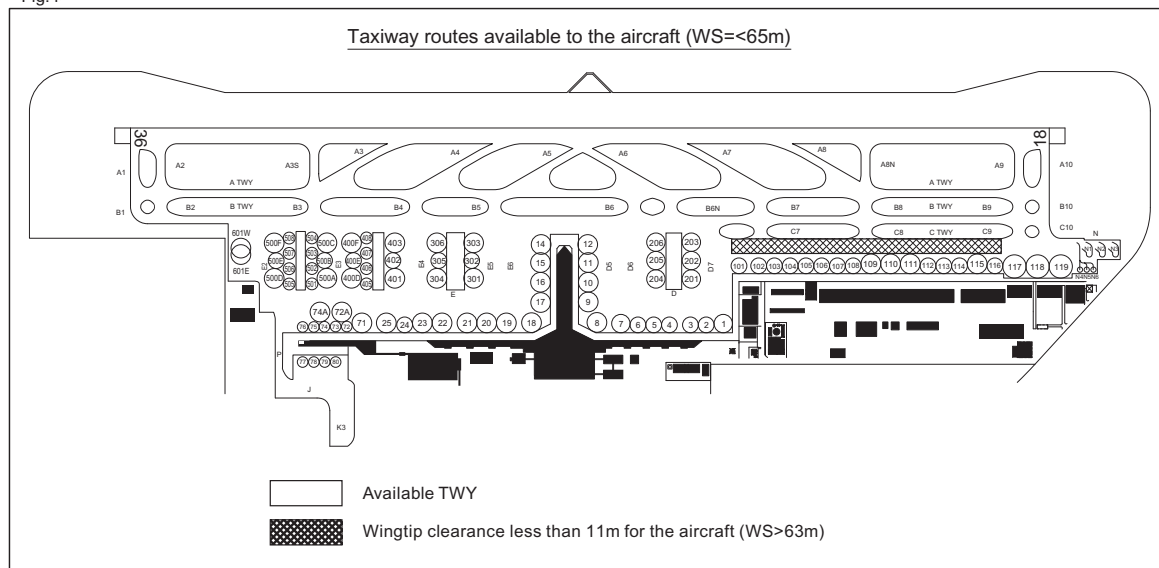

<Fig.2>

<Fig.3>

<Fig.4>

6.3 スポット誘導経路等の走行に係る制限（プロップを除く） (RJGG AD2.9 参照)

- (1) 航空機の移動開始時におけるジェットブラストによる影響を回避するため、航空機は次表の各経路を走行する場合において、操縦席が各ストップラインの真上に来る地点からそれぞれの離脱地点までの間、やむを得ない場合を除き、停止してはならない。

6.3 Restrictions relating to taxiing on the aircraft stand taxilanes etc. (except prop) (See RJGG AD2.9)

- (1) In order to avoid damage of break-away jet blast, aircraft, unless necessary, shall not stop between the point where the cockpit is above the stop line and the break-out point on each taxi route in the following chart.

Taxi route	Name of stop line	Break-out point (* 1)
D7 --> D	A	behind SPOT 3
D --> D7	B	behind SPOT 202
D --> D6	C	behind SPOT 205
D6 --> D	E	behind SPOT 5
D6 --> SPOT7,8,9	E	SPOT IN
D --> D5	D	behind SPOT 11
D5 --> D	F	behind SPOT 5
E6 --> E	G	behind SPOT 21
E --> E6	I	behind SPOT 15
E5 --> E	H	behind SPOT 21
E --> E5	J	behind SPOT 302
E5 --> SPOT19,18,17	H	SPOT IN
E --> E4	K,M	behind SPOT 305 (402)
E4 --> E (Aircraft nose to North)	L	behind SPOT 22
E4 --> E (Aircraft nose to South)	L	behind SPOT 25
E --> E3	O,R	behind SPOT 400E (500B)
E3 --> E (Aircraft nose to North)	P	behind SPOT 71
E3 --> E (Aircraft nose to South)	P	behind SPOT 76
E --> E2	S	behind SPOT 500E
E2 --> E	T	behind SPOT 76
P --> E2	Z	behind SPOT 500E
P --> E (Aircraft nose to North)	Z	behind SPOT 76
E --> P	U	STOP LINE Z
E2 --> P	T	STOP LINE Z

* 1: Details of the break-out point are as follows.

- 1) behind SPOT "x": The point where the cockpit is right next to the lead-in center line of spot "x".
- 2) SPOT IN: The stopping position in each aircraft parking stand.
- 3) STOP LINE "x": The point where the aircraft cross the stop line "x" completely.

- (2) 航空機は、各ストップラインから離脱地点までの間の区域内にて停止しなければならないと判断される場合は、各ストップラインにおいて停止するとともに、“セントレアグラウンド”に通報しなければならない。
- (3) 各ストップラインから離脱地点までの間の区域内にて停止してしまった場合は、速やかに“セントレアグラウンド”に通報し、待機すること
- (4) ジェットブラストによる影響を回避するため、最大離陸重量が 450,000 ポンドを超え、かつエンジンを 3 つ以上備える航空機は次の各経路の 180° 旋回を伴う走行を禁止する。
また 180° 旋回可能な航空機であっても、可能な限りエンジン出力を絞ること。

- 1) D5 及び D6 相互間（東側）
- 2) E5 及び E6 相互間（東側）
- 3) D から SPOT201 又は SPOT204
- 4) E から SPOT301 又は SPOT500D
- 5) E(北向き走行) から SPOT401 又は SPOT500A
- 6) E(南向き走行) から SPOT304 又は SPOT400D

- (2) If an aircraft anticipates that he will stop between each stop line and break-out point, the aircraft shall hold on the stop line, then notify to "CENTRAIR GROUND".
- (3) In case of unavoidable stopping between each stop line and break-out point, the aircraft shall notify to "CENTRAIR GROUND" immediately and keep holding.
- (4) In order to avoid the effect of jet blast, aircraft with a maximum take-off weight which exceeds 450,000 lbs with three or more engines are not allowed to make 180 degree turns.
For aircraft which are allowed to make 180 degree turns, always use minimum possible thrust while making the 180 degree turn.
- 1) between D5 and D6 (East side)
 - 2) between E5 and E6 (East side)
 - 3) D to SPOT201 or SPOT204
 - 4) E to SPOT301 or SPOT500D
 - 5) E(taxiing to north) to SPOT401 or SPOT500A
 - 6) E(taxiing to south) to SPOT304 or SPOT400D

* APPLICABLE when SSP IN FORCE.

** APPLICABLE when SSP IN FORCE and MULTIPLE RVRs AVAILABLE.

2. Lost communication procedures for arrival aircraft under radar navigational guidance

If radio communications with Centrair Approach/Radar are lost for 1 minute, squawk Mode A/3 Code 7600 and ;

- (I)
1. Contact Centrair Tower.
 2. If unable, proceed in accordance with Visual Flight Rules.
 3. If unable,
 - RWY36 in use : Proceed to PROBE or PIXIE at the last assigned altitude or 4,000FT whichever is higher and execute Instrument Approach.
 - RWY18 in use : Proceed to QUEST or POKER at the last assigned altitude or 4,000FT whichever is higher and execute Instrument Approach.
- (II) Procedures other than above will be issued when situation required.

3. Trajectorized Airport Traffic Data Processing System(TAPS)

セントレアアプローチの指示のもとに、当該進入管制区を飛行する航空機は、モード A/3 の二次レーダー個別コード及びモード C による応答を指示される。

二次レーダー個別コードを搭載していない航空機が当該コードによる応答を指示された場合は、管制官に対し、その旨通報すること。

Aircraft flying under control of Centrair approach control in the approach control area will be instructed to reply with discrete code on Mode A/3 and Mode C.

If an aircraft with non-discrete code capability be instructed to reply with the discrete code, it shall report a controller accordingly.

4. 場周経路における高度について

到着機が輻輳することを避け、かつ秩序ある飛行場周辺の航空交通の流れを促進するために、場周経路において航空機は以下の高度で飛行することが望ましい。

ただし、天候等により以下の高度により飛行できない場合は、“セントレアタワー”に希望飛行高度とともにその旨通報すること。

場周経路を飛行する際の高度は以下のとおり

- (1) 固定翼航空機
- i) ジェット 1,500ft
 - ii) プロペラ 1,000ft
- (2) 回転翼航空機 800ft

4. Traffic Pattern Altitude

In order to avoid congestion of arriving aircrafts and to make orderly flow on Traffic Pattern, aircraft are desirable to fly at the altitude.

However, in case it is difficult to fly at the altitude due to weather and so on, aircraft shall report it to "Centrair TWR" with your proposed altitude.

Traffic Pattern altitude as follows.

- (1) Fixed aircraft
- i) Jet 1,500ft
 - ii) Propeller 1,000ft
- (2) Rotor craft 800ft

5. Category II/III A/III B Operations at Chubu Centrair International Airport

中部国際空港におけるカテゴリーⅡ / Ⅲ A/ Ⅲ B 航行

5.1 Facilities

The following Categories are available:

Runway 18	Runway 36
<ul style="list-style-type: none"> • ILS Runway 18-CAT II • Lighting system Runway 18-CAT II • RVR by forward-scatter meters (the touchdown zone, the mid-point and stop-end of the runway) 	<ul style="list-style-type: none"> • ILS Runway 36-CAT III • Lighting system Runway 36-CAT III • RVR by forward-scatter meters (the touchdown zone, the mid-point and stop-end of the runway)

5.2 Conditions

A. The following systems must be operative:

For ILS RWY 18 approach (CAT II)	For ILS RWY 36 approach (CAT II)
(1) ILS comprising; <ul style="list-style-type: none"> • ILS-LOC 18 with standby transmitter • ILS-GP 18 with standby transmitter (When any standby transmitters unserviceable, down-grade ILS-CAT I.) • ILS-DME 18 	(1) ILS comprising; <ul style="list-style-type: none"> • ILS-LOC 36 with standby transmitter • ILS-GP 36 with standby transmitter (When any standby transmitters unserviceable, down-grade ILS-CAT I.) • ILS-DME 36
(2) Lighting system comprising; <ul style="list-style-type: none"> • PALS 18 (including side row barrettes) • High INTST REDL • High INTST RTHL • RCLL and RTZL 	(2) Lighting system comprising; <ul style="list-style-type: none"> • PALS 36 (including side row barrettes) • High INTST REDL • High INTST RTHL • RCLL and RTZL
(3) Secondary power supply	(3) Secondary power supply
(4) RVR by forward-scatter meters at the touchdown zone and either (the mid-point or stop-end of the runway).	(4) RVR by forward-scatter meters at the touchdown zone and either (the mid-point or stop-end of the runway).

For ILS RWY 36 approach (CAT III A/III B)
(1) ILS comprising; <ul style="list-style-type: none"> • ILS-LOC 36 with standby transmitter(including far field monitor) • ILS-GP 36 with standby transmitter (When any standby transmitter or far field monitor unserviceable, downgrade ILS-CAT I.) • ILS-DME 36
(2) Lighting system comprising; <ul style="list-style-type: none"> • PALS 36 (including side row barrettes) • High INTST REDL • High INTST RTHL • RCLL and RTZL
(3) Secondary power supply
(4) RVR by forward-scatter meters at the touchdown zone, the mid-point and stop-end of the runway.

B. The following information must be currently available:

- 1) Surface wind speed and direction
- 2) RVR

C. ITEM A and/or B are not met,the relevant information will be notified to the pilots as soon as practicable.

5.3 Precision Approach Terrain Profile Chart

See RJGG AD2.24

5.4 Operating Minimum

Approach minima stated in AD2.24 are observed.

5.5 Special Safeguards and Procedures (SSP)

CAT II/III A/III B Operations are available when SSP are applied.

SSP will be applied when the following conditions are met:

- a) Ceiling is at or less than 200ft and/or RVR is at or less than 600m.
- b) Facilities listed 1.above are operational.
- c) ILS Critical Area is protected.

In order to protect Critical Area for the succeeding arrival aircraft,an arrival aircraft may be given following instruction by ATC.

" *REPORT OUT OF ILS CRITICAL AREA* "

The exit taxiway center line lights are fixed alternate green and yellow inside the ILS Critical Area. If an aircraft is given the above instruction, she is expected to advise the ATC when the taxiway center line lights change from alternate green and yellow to steady green.

5.6 Approval for CAT II/III A/III B Operations

Operators must obtain operational approval from the State of Registry or the State of Operator,as appropriate,to conduct CAT II/III A/III B Operations. (See GEN1.5)

5.7 Runway Holding position Marking

Runway holding position markings are displayed on taxiways A1 through A10 and A3S, A8N; their locations are 107.5m off the runway center line.

Note:The common way of its markings so shown in RJGG AD2.24

RJGG AD 2.23 ADDITIONAL INFORMATION

- | |
|--|
| 1. Vessel (Max height 210ft/MSL) will occasionally pass in the vicinity of the airport.(See LDG CHART) |
|--|

空港周辺を船舶（最高高さ 210ft）が通過する場合がある。
